

Prepaid Refills

The revolutionary PreCash Prepaid Refill service allows you to take cash payments for your customers' top-up minutes from any of our 17 participating service providers without cumbersome refill cards.

As a Prepaid Refill merchant, you simply take the cash payment from your customer and complete the transaction electronically through a PC hooked up to the internet. You earn a commission on every refill sold. Commission rates vary, but PreCash consistently offers the highest rates available for each participating service provider.

Prepaid Refill is just one more way PreCash helps you to better serve your cash-paying customers while also adding to your own sources of revenue.

As a Prepaid Refill merchant you can:

Earn Higher Commissions. Percentages vary by service provider, with several in the 20% range.

Stop Spending Money on Cards and Shipping. Because the PreCash system is computer-based, there are no cards to buy, no shipping fees to pay. Some companies say they sell ePINS, but still charge you for shipping a CD full of virtual numbers.

Stop Wasting Time Managing Hot Cards. Again, the electronic PreCash system saves you time, money and a lot of hassle over traditional, card-based refill systems.

Get Unlimited Inventory, On Demand. With PreCash you get a refill any time you need it, without limit.

Use an Easier System. Use just one simple interface for all of your prepaid refills, regardless of service provider.

Drive Incremental Sales. PreCash provides comprehensive promotional materials for your POP that can help attract new customers. Further, because customers return to your store to make future payments, you have increased visits-per-customer that can result in increased sales of other goods and services.

How It Works:

Your clerk logs on to WebConnect, a secure PreCash website and selects customer's cell phone service provider and the refill amount from drop down menus. They collect the refill amount, click a button to submit and they're done.

A receipt is generated, containing the PIN that the customer needs to activate the minutes, and you receive your sales commission generally within two business days. It's a fast, easy, secure way to better serve your cash paying customers, and earn new revenue.
